

Keathley Landscaping Expands Sod and Grass Installation Services Across Dallas Suburbs

August 07, 2026

GARLAND, TX - August 07, 2026 -

Keathley Landscaping, a full-service landscaping company operating in the Dallas area since 2002, has expanded its sod and grass installation services to meet growing demand across a widening set of North Texas communities. The company now serves homeowners in Lakewood Dallas, Plano, Garland, Wylie, and surrounding areas with professional lawn transformation work that typically converts bare or damaged yards into established lawns within one to three days, depending on property size.

Sod installation involves laying pre-grown turf onto prepared soil, a method that establishes a mature lawn far more quickly than seeding. The company's crews handle site preparation, grading, and placement as part of the process. Keathley Landscaping sod projects generally follow an assessment of drainage and soil conditions to support long-term establishment and root development.

The expansion responds to seasonal interest among Texas homeowners seeking to replace worn turf and repair drought-affected lawns. Keathley Landscaping works with several grass varieties suited to the regional

climate, including St. Augustine, Zoysia, and Bermuda, allowing property owners to select turf appropriate to their soil, shade conditions, and maintenance preferences.

"A newly installed lawn changes the entire character of a property, and it also protects soil and adds measurable value," said Logan Keathley, owner of Keathley Landscaping. "The reason sod installation lakewood dallas homeowners request continues to grow is that it delivers an established lawn in a matter of days rather than the months required by seeding."

Beyond turf work, the company provides a broad range of outdoor services, including landscape design and construction, yard drainage and grading, French drain installation, stonework and retaining walls, flowerbeds and hardscapes, landscape lighting, fence repair and installation, patio covers, outdoor kitchens, firepits, and tree trimming and removal. This range allows the company to address turf installation alongside related site work such as grading and drainage, which often affect how well a new lawn performs over time.

Keathley noted that timing and preparation play a central role in outcomes. "Whether a client needs grass installation plano properties require after a renovation or a full landscape redesign, the groundwork determines the result," Keathley said. "Proper soil preparation and drainage are what separate a lawn that lasts from one that struggles."

The company reports steady demand for residential turf work throughout the growing season, with many projects driven by homeowners preparing properties for sale or recovering lawns damaged by heat and limited rainfall. Established turf can reduce erosion, moderate soil temperature, and improve the appearance and function of outdoor living areas.

Keathley Landscaping serves Dallas, Garland, Wylie, Plano, and the surrounding communities. Founded in 2002, the company offers landscape design and construction, lawn care and maintenance, sodding, stonework, fencing, and a range of related outdoor improvement services. The company focuses on a customer-centered approach and provides guidance to clients on fertilization, watering practices, and ongoing lawn care to help maintain healthy yards throughout the year.
